

12th September 2011

To whom it may concern,

MasterImage 3D PLC moved to our new Pinewood Studios offices in May 2010, we were then introduced to Precision Cargo, and have been using their shipping and logistic services expertise ever since for the shipment of our new 3D products and urgent spare parts to our customers, both inside and outside the European region.

As a relatively new company in Europe, MasterImage 3D PLC needed a logistics and shipping company we could both trust for the right advice in a crisis, and rely upon to deliver on all their promises – in this often confusing service industry we have never been disappointed with the service that Precision Cargo have provided. They have always done what they said they would do, provided a professional service, kept us informed, and given my company the confidence required every time that the job will be done.

MasterImage 3D and our customers in the cinema exhibition business are often not easily pleased and can be very demanding – as such it is very comforting when they complement our support services for which Precision Cargo are now playing a large part.

If you are considering the use of Precision Cargo and wish to discuss any of the above with me directly, please do not hesitate in contacting me.

Yours Sincerely

Brian Kercher
Managing Director – Cinema
MasterImage 3D PLC
